WELLNESS CLINIC PROGRAM REVIEW

01

PRESENTATION OUTLINE

OVERVIEW OF METHODS

Explaining the mechanisms behind the data

RESEARCH QUESTION

Brief summation of why this data matters

CONCLUSIONS

Opportunities for marketing initiatives and other supporting efforts

DATA MANAGEMENT

SHELTERLUV

One of the most popular medical record systems for rescue shelters

AIRTABLE

Freemium cloud
databasing tool, with
form submission and
advanced data
processing

EXCEL

Useful for building reports and analyzing data

EXAMPLE: CONDITIONAL STATFMFNT

```
f_x = IF([@[S?]] = "due", [@Weight] * 0.1,"")
                  IF(logical_test, [value_if_true], [value_if_false])
             ▼ Weight ▼ Vaccines? ▼ S? ▼ Strongid Dose ▼ F?
                                                               ▼ Flea
  ▼ age
7/17 8 weeks
                          FVRCP
                                           "")
7/17 2 months
                                                          due
9/17 2 months
                          DAPP,Bordatella
                       SELECT *
                       FROM Raw
                       CASE
                         WHEN S? = 'due'
                           THEN Weight * 0.1
                         ELSE
                       END as Strongid_dose
                       END;
```

Using Excel or SQL, it is easy to calculate the dosage amount for an animal once the treatments team enters their weight. An additional benefit is reducing calculation errors by the team.

```
X ✓ fx =IF([@FVRCP]="FVRCP",VLOOKUP([@FVRCP],Costs,2,FALSE),"")

K VLOOKUP(lookup_value, table_array, col_index_num, [range_lookup])

age Weight FVRCP DH(L)PP Bordatella Rabies S? Strongic

2 months 2 FVRCP due
```

```
SELECT

b.Treatment,

c.Price

FROM Base_Data AS b

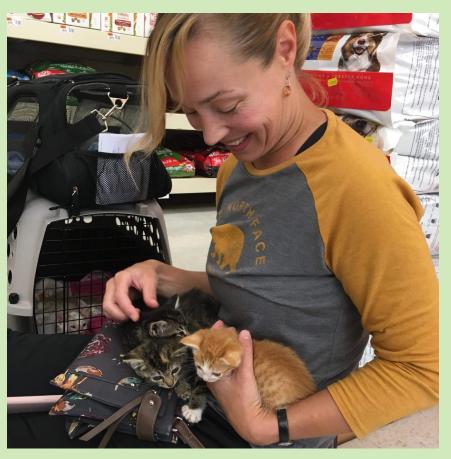

INNER JOIN Costs AS c

ON b.Treatment = c.Treatment
```

04

Here the SQL looks more complicated, but it's really just saying to join the information from Costs with the information from Base_Data and the records align in the shared 'Treatment' column.

FOSTERS RSVP FOR CLINIC

Caregivers register
their wards for the
clinic to let us know
how many they plan
to bring.

PRE-REGISTRATION

The day before the clinic, we look up the medical records for each animal who is expected to attend.

DAY-OF OPERATIONS

When the caregiver arrives, they check in and the animal is treated by trained volunteers.

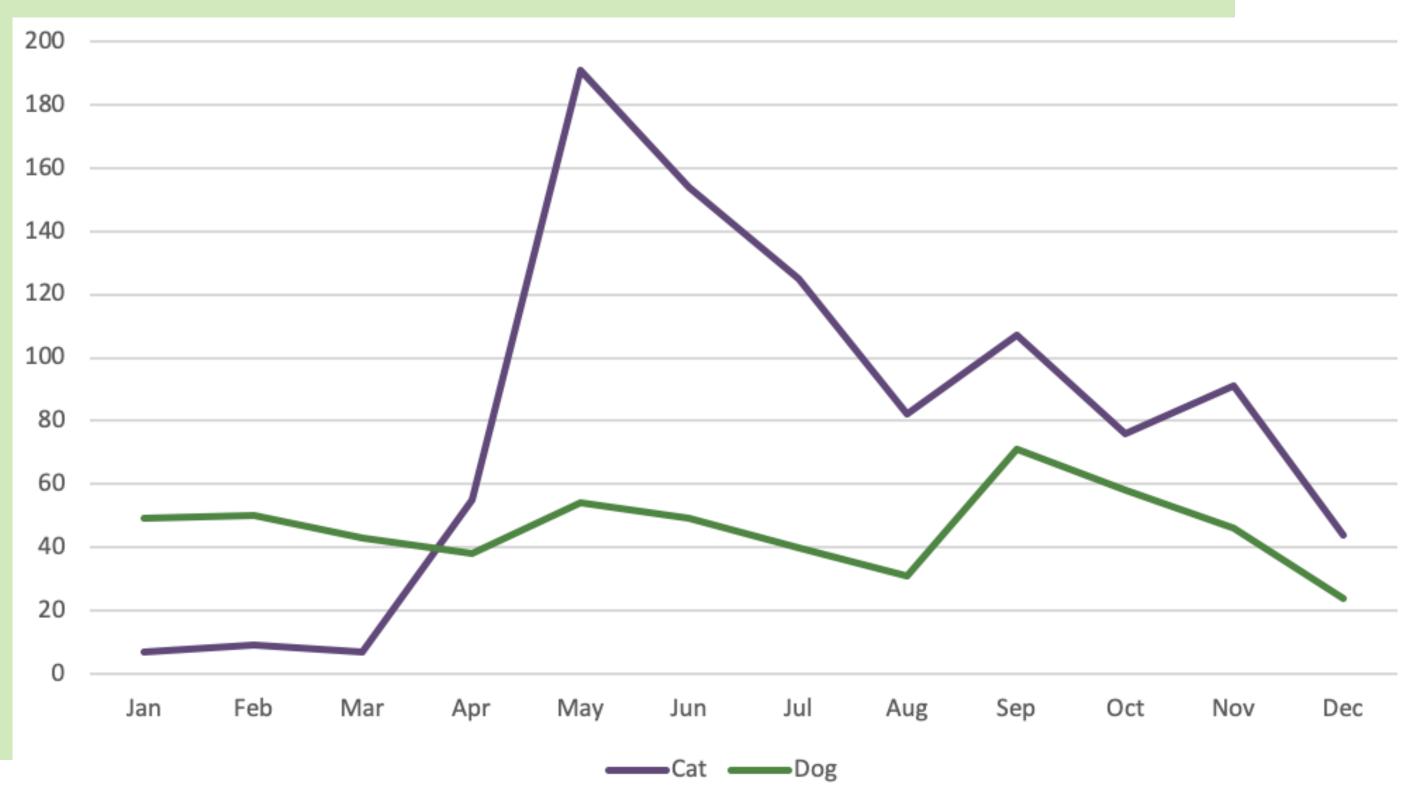

Where does the data come from?

RESEARCH QUESTION

What was the usage and cost of the 2019 Wellness Clinic program with SAPA?

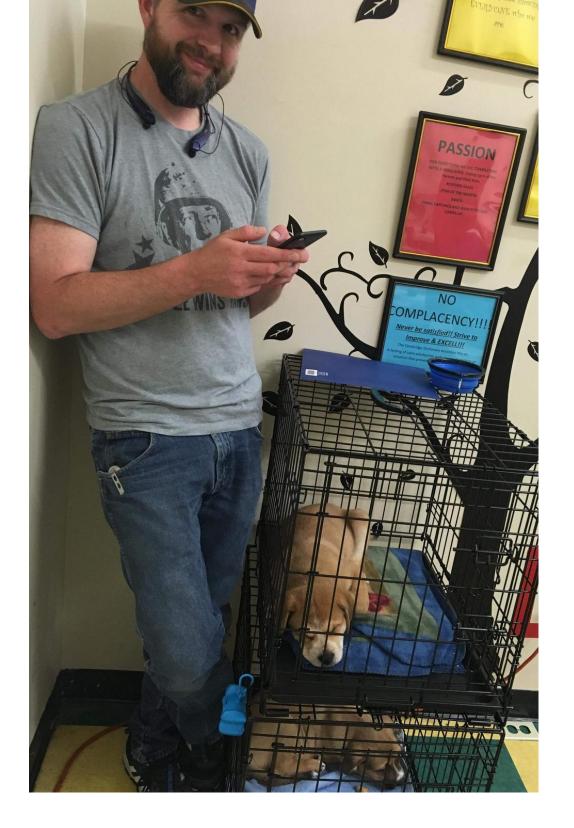

MONTH OVER MONTH COST PER FOSTER TREATED

| Ave. Cost per | Foster | Treated |
|---------------|--------|---------|
|---------------|--------|---------|

| 6 – | | | | | | | | | | | | Grand 10 |
|-----|--------|--------|--------|----------------|--------|--------|--------|--------|--------|--------|--------|----------|
| 5 — | \$5.14 | | | | | | | | | | | |
| 4 — | | \$3.91 | | | | | | | | | | 42.42 |
| 3 - | | | \$2.43 | \$2.49 | \$2.49 | \$2.90 | \$2.76 | \$3.27 | \$3.23 | \$2.99 | \$2.83 | \$3.43 |
| 2 – | | | \$2.43 | V 2.113 | ¥2.13 | | | | | | | |
| 1 - | | | | | | | | | | | | |
| 0 — | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec |
| | | | | | ,,,, | | | | | | | |

| By Month | ■ Attendence | Со | st of Care | Ave | erage of Cost of visit |
|--------------------|---------------------|----|------------|-----|------------------------|
| Jan | 56 | \$ | 287.77 | \$ | 5.14 |
| Feb | 59 | \$ | 230.42 | \$ | 3.91 |
| Mar | 50 | \$ | 121.67 | \$ | 2.43 |

| Grand Total | 1501 | \$ | 4,490.17 | \$ | 2.99 |

08

THE WELLNESS CLINIC IS A KEY RESOURCE FOR FOSTERS

With over 1500 animals cared for in 2019, the wellness clinic is an opportunity for fosters to build community, ask questions, and receive necessary preventatives.

BETTER COMMUNICATION AND MARKETING OF THE SERVICES PROVIDED IS NEEDED

As with all volunteer-driven programs, help is always needed to ensure fosters are aware of their options.
